

Colenta[®] MEDIPHOT X-RAY

Film processor overview:

The **COLENTA MEDIPHOT** range of Medical X-Ray film processors have been designed for use with auto processing chemistry to produce consistent high quality radiographic images using the range of general purpose Medical X-Ray films which are available from Colenta, and even Medical X-Ray films from other brands in the market can be processed. All models can also be used for developing Mammographic film.

All processing parameters (temperatures, development time, replenishment rates, etc.) are fully programmable to requirements and then automatically controlled to ensure consistent processing conditions at all times.

Display

All models are manufactured to meet the highest standards of health and safety, are all CE certified in compliance to the strictly controlled European laws that are applied to the production and operation of our products.

The processing capacity of each model of processor is based on the standard processing cycle for X-Ray Films at a 90 second Dry to Dry.

The **MEDIPHOT** range of medical x-ray film processors manufactured by **COLENTA** include:

MP900E

The **Colenta MP900E** is designed as a table top processor for low/medium processing needs. Designed for Radiologists in small hospitals/clinics not having a consistent day by day work load. As all Colenta X-ray processors, the **MP900E** supports a fully automatic dry to dry consistent film processing system.

MP943

The **Colenta MP943** is designed as a free standing processor for medium-high processing needs. Designed for Radiologists and medium hospitals/clinics. The processor is available in 2 Versions - providing a capacity of up to 171 films/hour of size 35x43 cm film at a 90 sec Dry-to-Dry.

MP902/903

The **Colenta MP902** is a free standing processor for high processing needs. Designed for big hospitals/clinics requiring high processing demands, The **MP902** provides processing capacity of up to 214 films/hour of size 35x43 cm film at a 90 sec.Dry-to-Dry cycle.

The **Colenta MP903** is designed as a free standing processor for highest processing needs. Made for large hospitals/clinics operating at 24/7. The **MP903** offers a capacity of up to 300 films/hour size 35x43 cm film at a 90 sec. Dry-to-Dry fully automatic & monitored processing cycle.
