Digital X-Ray Imaging Products
to cover all the needs of Radiologists / X-Ray Departments in Hospitals

The COLENTA DX Easy Imaging DR Retrofit Kits (Hardware/Software), cost effectively converts Film or CR based Radiography into high quality Digital X-Ray Imaging for general radiographic applications.

DX Easy Imaging X-AQS
Computer Hardware and Image Acquisition and Processing Software

DX Easy Imaging
Wireless Flat Panel Detector with AED* - Facility
*) Automatic Exposure Detection

COLENTA AED Flat Panel Detector

DX Easy Imaging uses the latest State of The Art direct X-Ray sensitive, portable, Flat Panel Detector 14”x17”/17”x17” with spatial resolution of 3.3 lp/mm to ensure superior image quality by meeting all requirements in high standard general purpose diagnosis.

The battery equipped Flat Panel Detector with AED-facility, fits into existing X-Ray tables or wall stands (like film cassettes or CR plates), with wireless connection to the computer and has no need of an interlink to the X-Ray generator. Permanent charging with backup cable with a magnetic charging connector is possible.

COLENTA AED Flat Panel Detector - Features & Benefits

- Use with existing X-Ray equipment
- Slim and light-weight design, approx. 3 kg
- Same dimensions as 14”x17”/17”x17” film cassette/CR panel
- Attachable tethered cable (optional) for Image Acquisition and Transmission through Gigabit Ethernet interface
- Brilliant Modulation Transfer Function (MTF)
- Automatic Exposure Detection AED, no need for interface to X-Ray generator
- 14 bit signal digitalization provides Wide Dynamic Range
- Communication through WLAN (IEEE 802.11n)
- Image acquisition and transfer time in approx.. 3 seconds
- Fully compatible with DICOM 3.0 \(^1\) standard
- Reduced X-Ray dose for patient safety
- Interchangeable, rechargeable panel battery

Multipanel Mode

It is feasible to use 2 Panels with one console with our DX Easy Image Software. So it is possible to operate one Panel in the stand and the second on/in the table.

Plug and Play Power and Data Switching

With the flexible design of our Panels it is possible to switch between different operation modes by plug and play. Simply unplug the TCP/IP Data cable to use the panel wireless and vice versa without a need of a new configuration of the device. A magnetic connector for the power plug ensures easy online switching between line operation and battery operation. This enables a fast change between fixed place and mobile mode operation of the panel.

\(^1\) DICOM Digital Imaging and COmmunications in Medicine
DX Easy Imaging X-AQS Software:

The **Image Processing Software X-AQS** is fully DICOM 3.0 compatible, providing image data transfer to any DICOM device, PACS or RIS, for efficient data management, printing, archiving and remote image viewing.

Fast network distribution – images can be automatically sent to other viewing stations, printers and archive servers – results in an efficient workflow leading to less wait time for patients and a higher patient throughput.

The **Image Processing Software X-AQS** provides consistent and excellent image quality, using optimized algorithms for each different body part, allowing various pre-set image processing modes for different studies, at considerably reduced X-Ray dose.

---

### Image Processing Software

- Patient Registration: Manually or DICOM Modality Worklist
- Image Acquisition + QC Tools
- Image preview in 3 Seconds
- DICOM Store/Transfer to PACS
- DICOM print to DICOM printer or “Print to Printer” for paper printer
- Export images formatted as .jpg, .tiff, bmp, and DICOM (with or without Viewer) to CD or other media
- Archive to CD/DVD
- Preconfigured with default anatomical exam tree and image processing parameters
- Black surround fill – Delete image
- Stitching – manually and automatically
- Exposure Index
- available in several languages
- Patient DVD with viewer

---

### Image Viewer Functions:

- **Zoom**
  - (turn to the left, flip, turn to the right, mirror)
- **Rotation and Mirror**
  - (Angle, Outline Distance, Add Text)
- **Measurement and Annotation**
  - (Gradation - brightness, contrast and gamma value
    Contrast inversion)
- **Window levelling**
  - (Left / Right markers)
- **Radiography Marker**
  - with individual gradation settings
- **Organ-specific filters**

Software controls detector, image acquisition and optimization, connects dose area product measurement device. Optional with fully integrated DX Easy Imaging X-AQS PACS solution.

Minimum Hardware Requirements for a Colenta DX Easy Imaging Capture Console:

- Operating system Windows 8.1 64Bit (not Windows 8/10)
- Processor min. Intel Core i5
- Min. 8 GB Memory
- HDD S-ATA 1 TB
- 2 x Intel GBit LAN controller
- Intel VGA graphic controller with 24 bit color depth
  Video Mode of graphic card supports OpenGL-Version 1.1
- Min. Screen resolution 1024x768 pixel
- CD/DVD-writer, Keyboard and mouse
